SUMMARY

Results-driven Frontend Developer with 8 years of experience specializing in modern JavaScript frameworks (Angular, React, Vue). Proven track record in technical leadership, having successfully led a team of 5 developers and mentored multiple junior developers throughout my career. Key contributor to enterprise-level design system, with significant experience in standardizing UI components and improving development workflows.

WORK EXPERIENCE

Frontend Developer, Deliverect Nov 2021 - Present

- Working on a marketing product in NextJS and contributing to the design system
- Started the first iteration of the Deliverect's design system as a collection of components based on Radix UI, vanilla-extract-css and storybook
- Worked as a frontend developer on the main Deliverect product with a large code base and helped with transition from Javascript to Typescript, migration from redux, redux-saga to react-query

Frontend Developer, Kirey Group (Unicredit) May 2020 - Oct 2021

- Upgraded a consumer finance application from Angular 7 to Angular 8.
- Became the go to person for the frontend on the consumer finance application
- Refactored several pages of a consumer finance application to use more RxJS and reduce bugs

Frontend Developer, Mobilesoft Jul 2016 - Nov 2019

- Started an application with Angular 2-7 and grew it to the main digital platform of Igea Banca. Used techniques as code splitting to reduce the bundle size, RxJs, and Reactive forms.
- Worked on small projects with NodeJS and MongoDB
- Worked on several hybrid mobile apps with Ionic and Appcelerator Titanium

EDUCATION

Bachelor's degree in computer engineering Oct 2014 - Oct 2019
International University UNINETTUNO

Diploma in Multimedia Technologies and Programming languages Oct 2014 - Jun 2016
Elis College - Rome
